

SAMUEL SUDEEP AYYALA

SOFTWARE ENGINEER | PLATFORM / DEVOPS | FULL-STACK SYSTEMS

Atlanta, GA | ayyalasamuelsudeep@gmail.com | github.com/SamuelSudeepAyyala | linkedin.com/in/samuelsudeepayyala

PROFESSIONAL SUMMARY

Software engineer with 4+ years of combined experience across enterprise application development, full-stack product work, CI/CD, cloud-native delivery, observability, and production troubleshooting. Recent work focused on developer-platform automation and repeatable test environments; personal projects explore practical AI-assisted workflows, monitoring, and secure full-stack application design.

TECHNICAL SKILLS

Languages & Backend: C#, .NET, Python, FastAPI, REST APIs, SQL, PostgreSQL, SQL Server
Frontend: Angular, React, Next.js, TypeScript, JavaScript, HTML5, CSS3
Platform & Delivery: Docker, Kubernetes, GitOps, Argo CD, Kustomize, GitHub Actions, Azure DevOps, Linux
Observability & Security: Prometheus, Grafana, Loki, Splunk, HashiCorp Vault, Burp Suite, Fortify
AI-Assisted Engineering: AI coding workflows, repository analysis, workflow automation, human-in-the-loop tooling

PROFESSIONAL EXPERIENCE

Software Engineering Intern Incident IQ Atlanta, GA	Jun 2026 - Aug 2026
- Contributed to a developer-platform modernization effort that made isolated pull-request test environments more repeatable for backend services using Kubernetes, GitOps, CI/CD, and automated validation. - Worked across application and infrastructure boundaries to troubleshoot build, configuration, deployment, authentication, and test failures, then documented reusable fixes and validation patterns. - Improved health-check, smoke-test, end-to-end testing, and observability workflows to make short-lived environments easier to validate and support.	
Software Engineer Community Dreams Foundation New Jersey	Aug 2025 - Jun 2026
- Developed and supported a web-based product with data workflows, search, user-facing features, and an FAQ assistant. - Worked with stakeholders to refine requirements, improve workflows, and turn evolving product needs into maintainable application behavior.	
Application Development Analyst Accenture Bengaluru, India	Nov 2020 - Aug 2023
- Developed and supported enterprise web applications using .NET, Angular, REST APIs, SQL Server, and deployment pipelines. - Automated and supported CI/CD releases across multiple environments while diagnosing application, integration, Linux, and production issues with engineering and QA teams. - Performed web-application security testing and vulnerability reporting using Burp Suite and Fortify.	

SELECTED PROJECTS

Job Application Assistant	Next.js, FastAPI, PostgreSQL, Clerk
Building an authenticated job-search workspace with user-approved automation, profile persistence, resume-evidence review, API isolation, and a browser-extension path.	
AIOps / Observability Lab	Python, Prometheus, Grafana, Loki, Docker
Built a containerized monitoring environment to explore metrics, logs, alerting, anomaly detection, and incident-response automation.	
Full-Stack Application Projects	.NET, Angular, FastAPI, PostgreSQL
Built role-based web applications and APIs covering authentication, persistence, CRUD workflows, testing, and containerized development.	

EDUCATION

Master of Science, Computer Science | New Jersey Institute of Technology | May 2025
Bachelor of Technology, Computer Science and Engineering | Karunya Institute of Technology and Sciences | Jun 2020
